T.Y. B. TECH **Year:** 2025 – 26 **Subject:** FSDL

Name of the Student: Rugved Zambare **PRN:** 123B1B140

Branch: Computer Engineering **Division: B**

Assignment:2

1. Objective

The primary objective of this assignment is to design and develop a personal portfolio webpage using HTML and CSS. The goal is to create a visually appealing and responsive web page that showcases personal information, skills, projects, and contact details. Bootstrap CDN is used to simplify styling and ensure responsiveness across different devices.

---

2. Learning Outcomes

After completing this assignment, the following skills and knowledge are gained:

- Understanding the structure of web pages using HTML.
- Applying CSS for styling, layout, and design improvements.
- Using Bootstrap CDN to create responsive and mobile-friendly designs.
- Learning how to organize and present personal and professional information effectively.
- Gaining experience in building user-friendly interfaces.
- Improving front-end development skills and design sense.

---

3. Brief Theory

A personal portfolio page is a static or dynamic website used to showcase an individual's profile, skills, and work. It acts as a digital resume and helps in presenting information in a structured and visually engaging manner.

HTML (HyperText Markup Language) is used to create the structure of the webpage, such as headings, paragraphs, images, and sections. CSS (Cascading Style Sheets) is used to style the webpage by adding colors, layouts, spacing, and fonts.

Bootstrap is a popular front-end framework that provides pre-designed components and a responsive grid system. By using Bootstrap CDN, developers can quickly build responsive layouts without writing extensive CSS code. It ensures that the portfolio page adapts well to different screen sizes like mobiles, tablets, and desktops.

   ==================================== */

// Project Data
const projects = {
  1: {
    title: 'AI Assignment Grading System',
    meta: 'Machine Learning &bull; 2025',
    description: 'An AI-powered grading system using deep learning to automatically classify
student assignments as correct or incorrect. Built with PyTorch and ResNet18 for fast batch
processing and intelligent feedback.',
    tags: ['PyTorch', 'ResNet18', 'CNN', 'Transfer Learning', 'Python'],
    details: 'This project streamlines educational grading by leveraging computer vision and transfer
learning to analyze assignment submissions with 85-95% accuracy. The system features
confidence-based quality control, concept gap identification, and batch processing capabilities that
reduce grading time by 80% while maintaining consistent evaluation standards across all
submissions.',
    links: { github: 'https://github.com/rugvedz21' }
  },
  2: {
    title: 'Local Music Player',
    meta: 'Full Stack &bull; 2024',
    description: 'A Spotify-inspired music player application with a sleek, modern interface.
Features include playlist management, album art display, and intuitive playback controls.',
```

```
    tags: ['JavaScript', 'HTML/CSS', 'Web Audio API', 'UI Design'],
    details: 'A comprehensive music player built from scratch featuring playlist creation and
management, album art display, smooth animations, and responsive controls for play, pause, skip,
and volume. The UI is designed for a vibrant and engaging user experience while maintaining a
cohesive visual identity.',
    links: { github: 'https://github.com/rugvedz21' }
  },
  3: {
    title: 'DWLR Flood Alert System',
    meta: 'Data Analysis &bull; 2024',
    description: 'Anomaly detection system that analyzes DWLR water-level data using Z-score
based threshold detection, triggering automated alerts when levels exceed thresholds.',
    tags: ['Python', 'Pandas', 'Z-Score', 'SMTP', 'Data Analysis'],
    details: 'Designed and implemented a statistical anomaly detection pipeline for real-time water
level monitoring. The system processes DWLR sensor data, applies Z-score based anomaly
detection to identify dangerous water levels, and automatically triggers email alerts via SMTP
when thresholds are breached. Built for reliability and early warning in flood-prone regions.',
